LEGACY SIGNAL

Why Us

A referral desk for the operating records of closed and closing companies. Free to sellers.

Informational handout · Not an offer, partnership claim, or guarantee · Public buyer pages reviewed Nov 5–6, 2026

Legacy Signal matches established closed and closing office firms — including those represented by bankruptcy trustees, estate attorneys, and executors — with AI-data buyers that license scoped, de-identified operating records. General data brokers, such as Grepped, serve companies of every type and status. We specialize in closed, established firms working through trustees and estates.

> **What buyers gain.** Pre-screened, documented datasets from established closed firms, with authority, ownership, confidentiality, and privacy reviewed before an introduction.

WHY WORK WITH LEGACY SIGNAL RATHER THAN GOING DIRECT OR THROUGH A GENERAL BROKER

1 The right buyer for the data

Buyers do not all want the same records. Some look for SOPs, CRM, and tickets; others list chat, code, or CAD. We match a package to buyers that publicly accept that profile, rather than a single cold pitch to the wrong desk.

2 An inexpensive screen first

We check whether records still exist, who can access them, and whether a buyer is interested — before anyone pays for technical work.

3 Legal and technical work, kept separate

Legal: authority, ownership, confidentiality, privacy, and court approval when a trustee must sign. **Technical:** systems, access, exports, and history. Mixing the two wastes time and creates risk.

4 More than one buyer, when there is a fit

A package can be shown to more than one eligible buyer so terms can be compared. Going direct to a single buyer forgoes that comparison.

5 Free to sellers. Buyers pay us, not you

There is no seller fee for our matching work, even if we find a buyer. Buyers pay Legacy Signal, not you, and we disclose that fee plainly. If export or other technical help is needed, the seller can hire independent specialists. The cost depends on the work involved, and we can help find resources if needed.

6 Experience with data deals

Matt Graves has led hundreds of data deals with some of the largest data companies in the world. He was formerly Chief Data Officer of Infogroup (formerly infoUSA; about $738M revenue) and led global operations teams at PayPal covering CRM, IT ticketing, knowledge base, and customer service systems.

7 Protection for both sides

Written buyer diligence and form agreements (for counsel review) are built to include:

- Exact dataset scope and exclusions — not vague labels such as “customer data.” Legal and technical questions stay in separate buckets.
- Privacy and PII handling, including prompt notice and deletion of stray personal data or samples.
- Written approval of every sample before it leaves; no onward sharing without new permission.
- Court approval when a trustee must sign; fees and deductions disclosed in writing; buyers register each introduction before identity is revealed, with non-circumvention and a prior-knowledge exception.

BUYERS ACTIVE IN THIS MARKET

BUYER / PROGRAM	WHAT THEY PUBLICLY BUY	CLOSED OR WINDING-DOWN?
micro1 Enterprise + Defunct	SOPs, CRM, tickets, and process documents (public partnerships page).	Yes — Defunct track (typically 30+ employees, English).
Handshake AI	Example sources include Slack, Gmail, Outlook, Google Drive, Notion, Monday.com, NetSuite, QuickBooks, and AutoCAD.	Not specifically published for closed firms; typically 20+ FTE, 3+ years.
Mercor Data	Tool examples include Slack, Microsoft Teams, Gmail, Outlook, Confluence, Salesforce, Google Drive, Notion, and GitHub (repositories, PRs, and issues).	Not specifically published for closed firms.
Scale AI	Chat (Slack, Teams, Google Chat); email and calendar; documents (Drive, SharePoint); work tools (Jira, Confluence, Asana, Notion); business platforms including Salesforce, HubSpot, ServiceNow, SAP, and Zendesk.	Not specifically published; prefers 40+ employees.
AfterQuery	Email, chat, tickets, CRM, support, and finance; industry systems also cited, including CAD and design histories.	Operating, winding-down, and closed welcome.
Ooak Data	Documents and files, project tools (Jira, Notion, Trello), CRM and sales, financial records, internal wikis, and code repositories.	Operating, winding down, and closed.
Mode data.mode.inc	Email, documents, chat, CRM, and billing data.	Operating companies and nonprofits; size floors by sector. Not specifically published for closed firms.
The General Data Company	Industrial archives, including technical drawings and CAD models.	Fit checked case by case; acceptance is not automatic.

Data types are taken from each program’s public pages, reviewed Nov 5–6, 2026. They are examples, not a promise that any named buyer will accept a given dataset. Specialist systems such as CAD are of interest to some buyers only.

Legacy Signal

Legacy Signal has no formal partnership with the companies listed; names are shown as examples of active buyers. Buyer interest varies by dataset. Legacy Signal is not affiliated with these companies and does not represent that it is formally partnered with or vetted by them unless a signed agreement says otherwise. This handout is informational; it is not legal advice, not an offer, and not a guarantee of fit, payout, or timing. Form agreements cited above are drafts for counsel review.
